

2011 continues to be an interesting year with trading patterns reflecting a rapidly changing market. Our customer base is daily becoming more broadly based due to the continuing expansion of web-based services.

As a result, we have seen further growth in our export markets and we have added Armenia, Bahrain, Ethiopia and Nigeria to our list of export nations in the last six months. We thank you all for your support.

In the domestic market we have seen little change in demand for supply to the educational sector but there has been some evidence of the shelving of projects in other sectors.

Acorn Powell is responding to the changes in demand by striving to provide the goods and services that our customers require. In recent weeks we have upgraded and expanded our Hospital Product range with improved HTM64 designs.

Also new to our range are the Solid Surface wash troughs in our ReZina range. Available in splashback (top) and taplanding (below) designs these have proved an immediate success. A wide range of colours is available. Sensor taps are supplied as standard but other options are available. Full details are available at our web site or by following this direct link: http://www.acornpowell.co.uk/html/wash_basins_solid_surface.html

You can now connect to our social media sites from links at the Acorn Powell website

Murdock Drinking Fountains

Another premium product enjoying increasing sales is Murdock. This range of outdoor drinking fountains is proving ideal for parks and heritage sites. Recent installations include one in the beautiful grade II listed Bishops Park alongside the river Thames in Fulham, London.

Model M30 in Bishops Park

Another fountain has been installed at an outdoor activity centre in North Wales.

Model GRM45 is a dual bowl fountain supplied to Treuddyn Community Council

Hospital Products

Our web site now has most of our new range listed. Please visit "Hospital Products" by clicking on our products menu. The new Janitorial Unit is illustrated here.
