

Installation and Maintenance Instructions

Apinox Product Code 256 Inset Wash Bowl

Installation

The washbasin is designed for insetting into counter tops up to 50mm thick.

A cut out 265mm diameter should be made in the counter top to accept the basin.

A suitable sealant should be applied to the underside of the bowl / surface of the worktop before fitting.

Secure the bowl to the counter top with the nuts and studs provided.

Fit the supplied waste fitting and complete the remainder of the plumbing installation.

Maintenance

Routine cleaning is necessary to maintain the appearance of stainless steel. Washing with soap or a mild detergent and warm water, applied with a sponge or bristle brush, followed by a clear water rinse is all that is required.

For further information please see our 'Care and Maintenance of Stainless Steel' leaflet
