Safety Warning

Shower seats are no stronger than the wall fixings and walls to which they are attached and must be firmly secured in order to support the loads for which they are intended. Consult and comply with local building regulations and standards. The unit will support static loads of up to 500 KG when properly installed and used. To avoid potential seat malfunction or potential injury, DO NOT use seat if weight exceeds 500 KG or if the shower seat is not adequately secured to the wall.
